

Millennium HSW-100 Heatset web fountain solution

- // Designed for high speed web presses
- // Designed to increase operator safety and environmental compliance
- // Fast restarts; reduces waste
- // Reduced wash intervals

Tower Products Europe supplies printers with high performance pressroom chemistry, aimed at increasing productivity. A complete line of innovative founts is manufactured in The Netherlands. Evidently, you will benefit from our permanent investment in research and development and our expert technical support.

By choosing the Millennium HSW-100, the use of alcohol during the printing process can be reduced or eliminated. This enables printers to produce more successfully and profitably.

Millennium HSW-100

Description

Millennium HSW-100 is a first class fountain solution for heatset web presses running at high speeds. The product has a strong buffering system and will work well in various types of dampening systems to provide fast, clean restarts. The product was designed to maximize the performance of printers running all types of plates, printing inks and fountain systems.

Specifications

Flashpoint	: 73° Celsius
VOC	: 6%
Odor	: Mild
Appearance	: Bluish Green liquid
Conductivity	: For every 1% of concentrate added, the conductivity increase will be +/- 530 µS.

Features and benefits

- Contains high technology wetting agent for reducing surface tension.
- Formulated for all plates and various dampening systems.
- Designed for high speed web press applications.
- Strong, unique buffering system against calcium carbonate.
- Reduced wash intervals and waste.

Directions for use

- // Always clean the dampening system before changing fountain solution.
- // Dosing 3 - 5% of Millennium HSW-100 per liter of water.
- // Read the Safety Data Sheet before use.

Packaging

Millennium HSW-100 is available in 21 kg | 220 kg | 1100 kg packaging.
