

Millennium 1000

Sheetfed fountain solution

- // Reduces/eliminates the use of alcohol
- // Increased productivity (less cleaning and set-up waste)
- // Improved printing quality and press stability

Tower Products Europe produces and supplies printers with high performance pressroom chemistry, aimed at increasing productivity. A complete line of innovative founts is manufactured in The Netherlands. Evidently, you will benefit from our permanent investment in research and development and our expert technical support.

By choosing the Millennium 1000 fount, the use of alcohol during the printing process can be reduced or eliminated. This enables printers to produce environment-friendly, more successfully, efficiently and profitably.

Millennium 1000

Description

Millennium 1000 is a first class fountain solution that does not require the addition of alcohol or alcohol substitutes to the fountain. It is formulated to run metal plates on all types of dampening systems. The product can effectively replace traditional products in most applications at a lower dosage.

Specifications

Flashpoint	: 68° Celsius
VOC	: 575 grams / liter
Odor	: Mild
Appearance	: Bluish green liquid
Conductivity	: For every 1% of concentrate added, the conductivity increase will be +/- 535 µS.

Features and benefits

- Contains high technology wetting agents.
- Formulated for continuous dampening systems.
- Lower dosage product.
- Buffered against calcium carbonate.
- Fast, true rollups without plate blinding.

Directions for use

- // Always clean the dampening system before changing fountain solution.
- // Read the Safety Data Sheet before use.
- // Dosing 4% of Millennium 1000 per liter of water.

Packaging

Millennium 1000 is available in 21 kg | 220 kg | 1100 kg packaging.
