

Millennium 3000 Sheetfed fountain solution

- // Reduces/eliminates the use of alcohol
- // Increased productivity (less cleaning and set-up waste)
- // Improved printing quality and press stability

Tower Products Europe supplies printers with high performance pressroom chemistry, aimed at increasing productivity. A complete line of innovative founts is manufactured in The Netherlands. Evidently, you will benefit from our permanent investment in research and development and our expert technical support.

By choosing the Millennium 3000 fount, the use of alcohol during the printing process can be reduced or eliminated. This enables printers to produce environment-friendly, more successfully, efficiently and profitably.

Millennium 3000

Description

Millennium 3000 is a first class fountain solution that does not require the addition of alcohol or alcohol substitutes to the fountain. It is formulated to run metal plates on all types of dampening systems. The product can effectively replace traditional two step products in most applications at a lower dosage.

Specifications

Flashpoint	: 93° Celsius
VOC	: 54 grams / liter
Odor	: Mild
Appearance	: Bluish green
Conductivity Range	: 583 µS per % + water.
pH	: 3.8 - 4.0
Conductivity	: 2915 µS
Press Ready Solution (4% per liter)	

Features and benefits

- Contains high technology low VOC wetting agents.
- Formulated for continuous dampening systems.
- Lower dosage.
- Low solvent content and buffered against calcium carbonate.
- Fast, true rollups without plate blinding.
- Excellent for use with metallic inks.

Directions for use

- // Always clean the dampening system before changing fountain solution.
- // Read the Safety Data Sheet before use.
- // Add 3-5% of Millennium 3000 per liter of water.

Packaging

Millennium 3000 is available in 21 kg | 208 kg | 1100 kg packaging.
